Further the pump and motor should also be lifted up so as to fix the eccentric taper. So it is proposed to replace this pump with new horizontal anti friction bearing single stage pump capable to deliver 2044 M³ per hour at head 46 mtr. The new pump shall have glass flack/corrocoat layer over impellor and inside the upper and lower casing to enhance the life of pumps and to reduce the effect of pitting & cavitations etc. The new pump will suitable to operate with existing prime mover of 450 HP/ 335 KW at 980 RPM.
